

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims

1-25. (Canceled)

26. (Currently amended) A continuous liquid flavor or fragrance system comprising from about 80 to about 99.5 weight percent a flavor or fragrance material and from about 0.5 to about 20 weight percent a cellulose polymer, wherein the cellulose polymer is selected from the group consisting of hydroxypropyl cellulose and ethyl cellulose, with the proviso that the continuous liquid flavor or fragrance system is not a liquid crystalline.

27. (Currently amended) A continuous liquid flavor ~~or fragrance~~ system comprising:
from about 70 to about 97 weight percent a flavor ~~or~~
~~fragrance~~ material;
from about 2 to about 30 weight percent an emulsifier; and
from about 0.5 to about 10 weight percent a cellulose
polymer,
wherein the cellulose polymer is selected from the group consisting of hydroxypropyl cellulose and ethyl cellulose, with the proviso that the continuous liquid flavor system is not a liquid crystalline.

28. (Canceled)

29. (Currently amended) The continuous liquid flavor ~~or fragrance~~ system of claim 27, wherein the emulsifier is selected from the group consisting of mono or di-glycerol ester of fatty acid, polyglycerol ester, and sorbitol ester.

30. (New) The continuous liquid flavor or fragrance system of claim 26 comprising from about 85 to about 95 weight percent the flavor or fragrance material.

31. (New) The continuous liquid flavor or fragrance system of claim 26 comprising from about 5 to about 15 weight percent the cellulose polymer.

32. (New) The continuous liquid flavor or fragrance system of claim 26 comprising from 3 to 8 weight percent the cellulose polymer.

33. (New) A continuous liquid flavor system comprising:
from about 78 to about 92 weight percent a flavor material;
from about 5 to about 20 weight percent an emulsifier; and
from about 2 to about 8 weight percent a cellulose polymer,
wherein the cellulose polymer is selected from the group consisting of
hydroxypropyl cellulose and ethyl cellulose, with the proviso that the continuous liquid
flavor system is not a liquid crystalline.

34. (New) The continuous liquid flavor system of claim 33, wherein the emulsifier is selected from the group consisting of mono or di-glycerol ester of fatty acid, polyglycerol ester, and sorbitol ester.
